ACT test score ranges used by the Wyoming Community Colleges as course placement guidelines are called transition scores by the Community College Commission staff members. An incoming student with an ACT test score at or above transitions scores is placed in a college level English composition course, a college level Math course or a Reading intensive social science course. **An incoming student with a lower score may be placed in a developmental course section based upon further testing and/or criteria. The Academic Affairs Council of WCC has adopted a statewide Reading Articulation agreement, that reading transition scores for reading intensive courses is an ACT Reading score of 21 or higher.**
